"May You Live in Interesting Times" is an ancient Chinese curse. History is written about disasters, wars, and other destructive events. Times of peace and plenty go unrecorded. Humans fail to use the Forefront of Science and Knowledge in any field. We Ignore the many Lessons of History, Sociology, & Science!

►Plan for No Oil after 2100. ►Farms Use Oil.

Earth's Oil Is Gone by 2100. Weather cycles alone require reducing population below 2 billion. ►How many people can Earth support with no oil for agriculture, food transport, and food processing, with weather cycles reducing crop production drastically? Perhaps 500 million at the most if we do everything right.

►Promote using all Seven Elements of the Scientific Method and Four Design of Experiment tools. Work with Entire Integrated Holographic SubSystems. ►Establishments Suppress Innovation & Research Throughout History & Today, Still Shooting the Whistle Blowers. ►Why do people habitually believe that Science is wrong? How do we change these destructive habits? This is very urgent.

►Ocean's CO₂ increased to 377 ppm from 200 ppm since 1958. This continued increase will destroy phytoplankton, the food chain foundation for fish. No fish by 2400? Can genetic research redesign phytoplankton to survive with increased CO₂ in oceans and

lakes???

► Food production reduction by weather cycles plus overpopulation is the most urgent emergency of the eight major disasters facing humanity. Plan ahead??? Or starve billions very soon? Anti abortion anti birth control killed half of the 18 million starved since 1893, and will kill 100-200 + million this century, six billion from 2100 to 2400. The Gulf Stream may stop bringing warmth to Atlantic basin agriculture by 2400?, drastically reducing crop yields for all Atlantic basin countries. ► Crops are reduced drastically by weather cycles creating far worse crop conditions than Earth has had for eons. This is made far more disastrous with no oil for agriculture by 2100.

Melting of tundra far more rapidly than expected, releasing vast stores of Methane, may create a feedback loop, melting tundra at increasing rates, speeding global warming. This has the potential of complete catastrophe for most life on Earth. This cycle happened twice before, destroying most life on Earth. This

methane release feedback loop speeding Earth's heating may be irreversible if it continues at its present rate of increase. Plan to reduce it.

► An ancient Chinese curse "May You Live in Interesting Times" applies today. History records wars, turmoil, troubles, and disasters, not peace.

The failures of government to eliminate all greenhouse gases will murder 100-200 million by 2100, perhaps six billion by 2400, perhaps almost all life on Earth. Violates Civil Rights.

► Glacier and polar ice melting will raise ocean levels 4.6' by 2100, 7.6' by 2200.

► CO₂ Increasing in Oceans may destroy Phytoplankton by 2500. They are the Foundation for the Ocean Food Chain. ► URGENT Need-- Genetic Redesign of Phytoplankton for High CO₂ environments!!! ..► EARTH in 2100's can support only 500 million, if we are very lucky, with No Oil for Agriculture, Weather Cycle Changes, No Fish in 400 years. ► Starve 6 Billion 2100-2400 or Reduce All Populations Very Rapidly. Which will we do???

► Anti abortion is genocide of billions, as we lack sure birth control methods, none for poor cultures. Violation of Civil and Human Rights.

Women die in pregnancy and child birth in all cultures, one in six to one in 2,700.

► Anti abortion is manslaughter of many women. This violates their Civil Rights. Abortion is ten times safer than pregnancy and birth. Overpopulation starves 100-200 million by 2100. ► All religions, non profits, governments, and people acting against rapid population reduction in any way are involved in

Sociology Cultural Psychology research proved that only 4.6% can consider new to them info that conflicts with their Mind Set. This is the Vested Interest Syndrome Creativity Enhancement tools to Increase the Rate of Invention and the Possibility of Breakthrough Discoveries, the use of and implications of the massive Paradigm Shifts and each of the 46 scientific discoveries that have proven the mechanistic view of the world to be a fantasy, requiring us to completely discard it.

genocide of humanity. Catholic and other religions fail to Husband the Earth, killing many. Promoting genocide is an illegal act .

►► Breast feeding improves health of babies, children, and adults. Any action mystifying breasts reduces breast feeding, killing some babies, kids, and adults. Breasts aren't sexy.

De Mystify Breasts. European Sunbathing areas, parks are topless, with 98% of babies breast fed. USA-Only 10% of babies are breast fed.

►►► Scientists report "An Oak Ridge type project with today's sciences can develop new power sources from the underlying structure of matter". I estimate \$1.5 trillion max & 60+ years to solve this and many other projects. Start now.

► When we approach all projects as MultiDimensional Holographic SubSystems that we are integrated with, we can accomplish much that seems unlikely when we fail to address the actual design of our world and ourselves. This will improve R & D, Health, Safety, Security,

Agriculture, Education, Homes, World Peace, interrelated problems. Add Critical Thinking.

►Why ignore Holographic Physics and research indicating solutions: new power sources, eliminate radiation, toxins, pollutants, control weather, solve regeneration and many other problems?

Humans developed the info and abilities to create warm, caring, effective communities in all cultures. Let’s do it now. ►►►Volunteer–Help Change Our World! Join Us. Save Lives & Suffering–Require Holistic Health Integration, Safety Training, & Rebuild Ecological Systems.

►PLAN AHEAD for Long Term Human Survival. Require all straw bale construction with fireproof exteriors, triple glazed windows, solar panels, and lowest possible energy use. Stop destruction by Vested Interests acting against the best interests of cultures, people, families, children, and Mother Earth. We have no place to move humanity to, yet we increase the rate of destruction of ecological systems and people, even build on crop land.

Tundra is melting at a rapidly increasing rate, releasing massive amounts of Methane, a far worse greenhouse gas than any other. A bacteria in rice fields creates and releases 1/3 of the methane.

►Genetic redesign of people for empathy, intelligence, social cooperation, and long term planning is urgent.
