WORLD HEALTH = WORLD PEACE

Proposal: Use the Forefront of Science & Knowledge in All of humanities’ Decisions.

Use All Of Our Geniuses Information To Create An Ecologically Balanced Peaceful Planet.

Plan Ahead For 100 Thousand Years To Enable Ecological & Human Survival.

Dear Japan,

Cultural Psychologists studied humans bad habit of psychologically discounting any new to them info that disagrees with their mind set. They call this the Vested Interest Syndrome, and found that establishments and individuals faced with info that conflicts with their belief system, refuse to see it, discount it, discard it, and even create false info to protect their beliefs and establishments. This gets all nations into avoidable difficulties. Only 4.6% of humans can even consider any info that conflicts with their mind set. All nations ignored 32 studies of training that reduces accidents 98% to 99.7%, 38 studies finding that errors drop 96% to 99%. Training increases the intuitive awareness of danger, best action, errors, and creativity. Add four tools to consistently gain 99.7% less accidents and errors. Use NeuroLinguistic Programming to permanently eliminate the internalization of stress in three to ten hours and stay stress free. Ten tools to permanently eliminate

stress internalization.

The thirty second safety study was done by a university near Tokyo. The study group of 500 people were doing Tai Chi, Aikido, and Meditation. In 1987 an AP story on this study was in all major papers in the USA, and many throughout the world, yet neither military, security forces, pilots, or drivers were required to use this training. Many police require Aikido. These studies have been apparent in USA literature since 1938, India 729 AD, in the Orient since at least 1738 BC. People that do not internalize stress avoid accidents and errors. When we are harmonious with our selves, jobs, and environment we are free of error and accidents. I included this in a proposal to correct many errors in our military and government. I sent this to Joint Chief of Staff Colin Powell in 1992, and sent to politicians, military, and media many times since then.

Admiral Frederick Ruche, Commander San Diego Naval Base and his Inspector General were given our information March 5, 2000. Both failed to act. Admiral Ruche refused to talk with me. Our Department of Defense, DOD, IG, media, and politicians have failed to consider this information. The safety training study information could have been implemented then, and would have prevented many plane failures and the sub ship accident. Why didn't you advise your representative at the accident hearing of this fact? I have sent this to Commander Pac Fleet without response. His staff gave it to the IG, which hasn't checked references or evidence. You may be heard, as your university did the 1987 study..

I ask your help to get all leaders aware of the massive amount of research that would solve and prevent our worlds many problems, yet still gets ignored for generations. When all leaders are

fully aware of the eight major disasters facing humanity, we may be able to correct our bad habits of failing to think or plan ahead before we destroy all possibility of a good future on a habitable planet. We are low on fresh water. One half of the worlds oil will be gone by 2028, gas 2042. All gone by 2100. They aren't making any more, yet our short sighted nations are failing to treat this as a major emergency. All vehicles need to be designed for maximum gas millage. All poor milage vehicles need to be made illegal. Cars need to required to meet 50 miles per gallon or better. Low gas milage vehicles and SUV's destroy our future. We lack the farm land and resources to grow fuel. We will be very hard pressed to grow food as weather cycles through disastrous changes.

I ask your help in creating those projects needed to improve our possibilities of peace and survival. We plan, and seek funds for, an education firm to create teaching materials for leaders, educators, and citizens to retrain everyone on the forefront of science and human knowledge, and why we ignore new to us info for many generations. We plan a Psychotronic Device firm to improve the current designs that are being made by seven+ firms. These eliminate any specific pest, virus, bacteria, fungus, or mold in the target area, using a different frequency for each item. They are ignored by government agriculture and health 'experts' because they are only explainable in terms of MultiDimensional Holographic Physics. The Tower, a standing wave device, makes plants and animals healthier and calmer in a 2500 acre area, reducing birth defects 98.7%. We need these in all cities, hospitals, and embassies. Integrating Holistic Health into Japans health system will save you about 56% on health care costs, and save lives and suffering. India is the first to integrate it into medical schools and slowly into systems. Why wasn't Japan the first to use the forefront of science in health, healing, and prevention?

Most MD's, 65%, in the Netherlands work with Energy Healers. Energy Medicine heals all injuries, illness, birth defects, and genetic anomalies. Physics applies to people.

Research in physics shows several possibilities of developing new power sources from the underlying structure of matter. We developed nuclear power with 1938 physics. An Oak Ridge type project based on today's physics can create the new non destructive power sources we need for survival. This needs to be started now. It may take 60 years. The spinoffs will be very valuable. Creating a \$1.5 Trillion research project will solve this. We seek firms, individuals, and countries to help design and implement this project. Genetic research is needed to develop plants that will produce oils and fuels at low cost. Research to create food crops that can handle warmer, colder, wetter, and drier climates is very urgent. All researchers and leaders need to fully understand that our universe and us are MultiDimensional Holographic SubSystems, not mechanistic. This makes a substantial difference in improving all research projects and in planning and decision making. Humans can achieve world peace. Help us help you.

All good agriculture land must be protected against all development. We are very short on farm land. Weather cycle studies show that our planet can only support 3 billion at most, if we are very lucky. We must develop programs to drop population levels drastically and very rapidly, or billions will starve in a world free of our needed ecological foundation.

We seek funding, volunteers, concepts, and partners for these many urgent projects.

Call me and let's work together to create the needed tools for survival, peace, and prosperity.

Sincerely, Dr Doug Hemstreet PhD CEO Founder
